Report of Independent Auditors

Board of Commissioners
Public Utility District No. 1 of Lewis County
Chehalis, Washington

Report on the Financial Statements

We have audited the accompanying individual and combined financial statements of Public Utility District No. 1 of Lewis County's Electric System and Cowlitz Falls System (the District), which comprise the individual and combined statements of net position as of December 31, 2017, and the related individual and combined statements of revenues, expenses and changes in net position and cash flows for the year then ended, and the combined statement of net position as of December 31, 2016, and the related combined statements of revenues, expenses and changes in net position and cash flows for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the District as of December 31, 2017 and 2016, and the results of its operations and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the accompanying management discussion and analysis, schedule of the District's proportionate share of the net pension liability, and the schedule of District contributions on pages 46 and 47 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated May 25, 2018 on our consideration of Public Utility District No. 1 of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

Public Utility District No. 1 of Lewis County Management's Discussion and Analysis

This discussion and analysis is designed to provide an overview of Public Utility District No. 1 of Lewis County, Washington (the District) financial activities for the year ended December 31, 2017, with comparable information for 2016 and 2015. This required supplementary information should be read in conjunction with the District's financial statements and notes to financial statements.

The District is a municipal corporation incorporated in 1936 to serve the citizens of Lewis County, Washington. The District is governed by a three-member board of locally elected commissioners, independent of the county government. The District manages and operates two systems: Electric Distribution System (Electric System) and the Cowlitz Falls Hydroelectric Generation Project (Cowlitz Falls System).

Overview of the Financial Statements

In accordance with requirements set forth by the Governmental Accounting Standards Board, the District's financial statements employ the accrual basis of accounting in recognizing increases and decreases in economic resources. Accrual accounting recognizes all revenues when earned and expenses when incurred during the year, regardless of when cash is received or paid.

Basic Financial Statements

The Statement of Net Position presents the District's net position as the difference between assets and deferred outflows of resources, and liabilities and deferred inflows of resources. The Statement of Net Position provides information about the nature and amount of investments in resources (assets), the consumption of net position in one period that are applicable to future periods (deferred outflows of resources), the obligations to creditors (liabilities), and the acquisition of net position that are applicable to future periods (deferred inflows of resources).

The Statement of Revenues, Expenses, and Changes in Net Position reports the revenues and expenses during the periods indicated and identify operating activity separately from non-operating activity.

The Statement of Cash Flows provides information about the District's cash flows from operating activities, capital and related financing activities, investing activities, and noncapital financing activities, and presents a reconciliation of net operating income to net cash provided by operating activities.

Notes to the Financial Statements

The notes to the financial statements provide additional information that is essential to a full understanding of the figures provided in the basic financial statements.

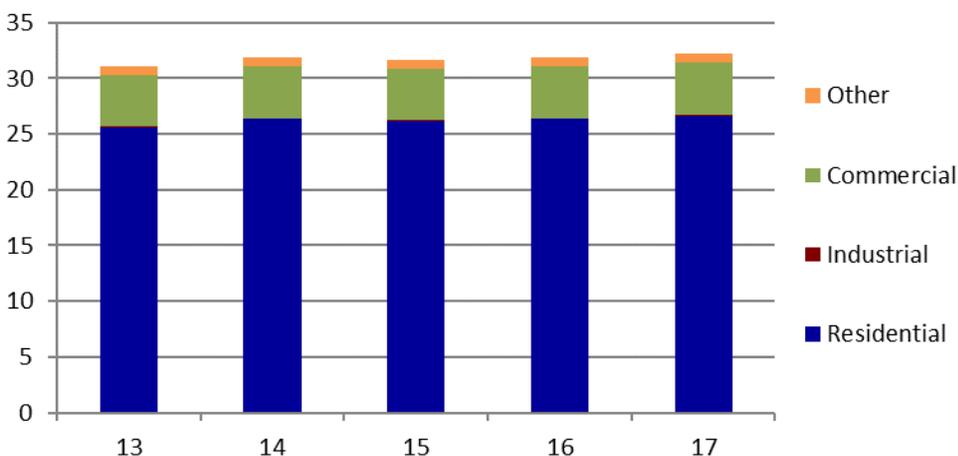

Public Utility District No. 1 of Lewis County Management's Discussion and Analysis

ELECTRIC DISTRIBUTION SYSTEM

The Electric System provides electric service throughout Lewis County with the exception of the City of Centralia who is served by the City's Municipal Light and Power Department. Currently, the District serves 32,170 customer connections within approximately 2,530 square miles comprising 2,915 miles of distribution line and services. Power supplies are primarily provided to the District through purchase power contracts with Bonneville Power Administration (BPA). Weather and economic climate are the primary conditions that influence electricity sales. Generally, extreme temperatures increase sales to customers who use electricity for cooling and heating, while moderate temperatures produce moderate sales. Seasonal influences exist from industrial customers that are related to agriculture products peaking during the District's summer months in contrast to residential customers peaking during the winter months from heating. Economic conditions have shown slight, but steady improvements in Lewis County over the past couple of years.

Customer Connections

(by customer class in thousands)

Financial Summary and Analysis

During 2017, the Electric System's net operating income before other revenues (expenses) and contributed capital was \$3,300,784, which was a change of \$3.61 million from 2016. The factors influencing these results in 2017 include:

- Total operating revenues increased by \$5.14 million or 7.6%.
 - Revenues from sales to customers increased \$5.15 million or 8.4% due to the rate increase effective April 2017, and a 5.7% increase in kilowatt hours sold.
 - Revenues from wholesale increased \$214,000 or 5.4% due to increased volume.
 - Other operating revenues increased \$58,700 or 2.4%
 - The Board of Commissioners approved the transfer of \$370,545 to the rate stabilization account, an increase of \$277,955.

Public Utility District No. 1 of Lewis County Management's Discussion and Analysis

- Total operating expenses increased by \$1.54 million or 2.3%.
 - Purchase power expense increased by \$1.77 million or 3.9% primarily due to increased BPA expenses.
 - Other operating expense decreased by \$425,110 or 4.3% primarily due to a reduction in recognized pension expense.
 - Maintenance expense decreased by \$353,560 or 8.3% primarily due to a reduction in overhead and underground line maintenance.
 - Depreciation expense increased by \$61,320 or 1.4% as a result of capital additions.
 - Taxes increased by \$488,870 or 11.1% primarily as a result of higher retail sales.

Public Utility District No. 1 of Lewis County Management's Discussion and Analysis

Capital Asset and Long-Term Debt Activity

As of December 31, 2017, the Electric System had \$181.4 million invested in a variety of capital assets in service. This represents an increase of \$4.1 million or 2.3% from 2016. As of December 31, 2016, the Electric System had \$177.3 million invested in a variety of capital assets in service. This represents an increase of \$3.2 million or 1.8% from 2015. Capital construction is provided for through a combination of construction fees and cash flow from revenues, and represents normal additions to the system.

	(in thousands)		
	2017	2016	2015

	<u> </u>	<u> </u>	<u> </u>
Total plant in service	\$ 181,430	\$ 177,383	\$ 174,087

In December 2016, \$20.602 million in Electric System Revenue Refunding Bonds were issued to advance refund all of the outstanding Revenue Bonds, Series 2008A. In 2017, revenue bonds outstanding were \$20.602 million, which is a decrease of \$5.275 million or 20.4% from 2016. In 2016, revenue bonds outstanding were \$25.877 million, which is a decrease of \$757,600 or 2.8% from 2015.

Power Supply

The District signed a 20-year Block and Slice Power Agreement with BPA on December 1, 2008, with the contract taking effect on October 1, 2011. The District also purchases wind power in order to comply with Initiative 937 renewable resources requirements.

COWLITZ FALLS HYDROELECTRIC GENERATION PROJECT

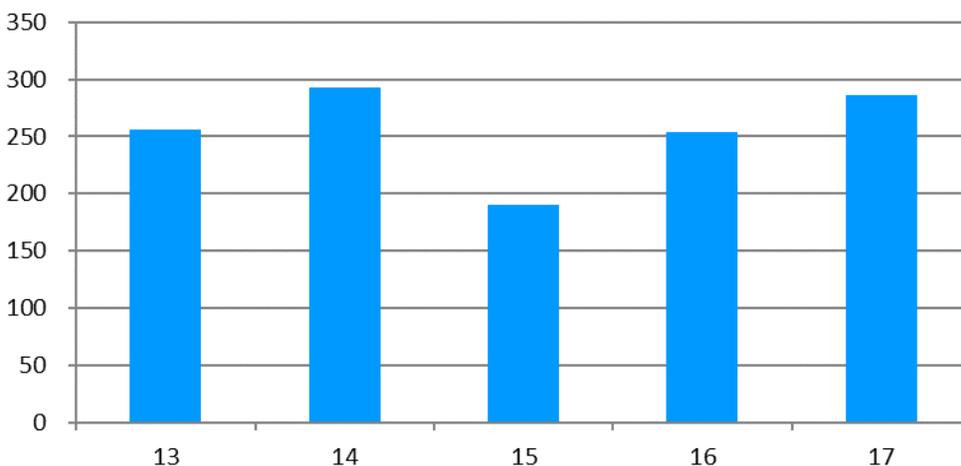

The District operates the Cowlitz Falls Project (System or Project) located on the upper Cowlitz River in eastern Lewis County. The powerhouse contains two Kaplan turbine generating units with net installed capacity of 35 MW each. Average annual generation is estimated at 265 million kilowatt hours.

Project operation depends upon the "run of the river" to produce the maximum amount of electric energy. Generation output in 2017 rebounded to slightly more than average after 2016 was slightly less than average.

Public Utility District No. 1 of Lewis County Management's Discussion and Analysis

Cowlitz Falls Output

(in thousands of megawatt-hours)

Financial Summary and Analysis

Revenues for the Cowlitz Falls Project are recognized on the basis of the Amendatory Power Purchase Contract between the District and BPA. Through this contract, BPA receives all output from the Cowlitz Falls Project in exchange for payment of all operation and maintenance costs and debt service on the Cowlitz Falls Project revenue bonds.

See accompanying notes.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 1 – Nature of Organization and Operations

Public Utility District No. 1 of Lewis County (the District) is a municipal corporation of the State of Washington and is governed by an elected three member board. The District was organized in 1936, pursuant to a general election in accordance with the Enabling Act, and commenced its operations in 1939. The District has its administrative offices in Chehalis, Washington, which is located in southwestern Washington.

The District manages and operates two systems: Electric Distribution System (Electric System) and the Cowlitz Falls Hydroelectric Generation Project (Cowlitz Falls System or Project). The Electric System provides electric service to substantially all of Lewis County, except for the City of Centralia. The District constructed and, beginning in June 1994, operates the Cowlitz Falls Hydroelectric Dam on the upper Cowlitz River in eastern Lewis County, Washington (see Note 8). The Electric System and Cowlitz Falls System are separate operating systems.

Note 2 – Summary of Significant Accounting Policies

Reporting entity – In evaluating how to define the government, for financial reporting purposes, management has considered the District's financial reporting entity. The financial reporting entity consists of the District and component units. Component units are legally separate organizations for which the District is financially accountable and other organizations for which the District is not accountable but for which the nature and significance of their relationship with the District are such that the exclusion would cause the District's financial statements to be misleading or incomplete. Based upon this criterion, the District has no component units.

Basis of accounting and presentation – The District is considered an enterprise and operates as a proprietary fund. The financial statements of the District have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (GAAP) as applied to governmental units. The District has applied all applicable Governmental Accounting Standards Board (GASB) pronouncements.

The Uniform System of Accounts, as prescribed by the Federal Energy Regulatory Commission (FERC), is the basis for the District's accounting policies. The accounting records of the District are maintained in accordance with methods prescribed by the State Auditor under authority of Chapter 43.09 RCW.

The accompanying financial statements include the individual and combined statements of financial position of the Electric System and Cowlitz Falls System and the results of operations and cash flows for each system. All significant intercompany balances and transactions have been eliminated from the combined amounts reported.

Concentration of credit risk – The District's financial instruments that are exposed to concentrations of credit risk consist primarily of cash, temporary investments and receivables.

Public Utility District No. 1 of Lewis County Notes to Financial Statements

Note 2 – Summary of Significant Accounting Policies (continued)

The District maintains its cash and temporary investments in bank deposit accounts which exceed federally insured limits. However, all deposits are made with state-approved depositories and are protected under the State's Public Deposit Protection Commission (PDPC).

Credit is extended to customers generally without collateral requirements, however, deposits are obtained from certain customers and formal shut-off procedures are in place.

Utility plant – Utility plant assets are stated at cost (see Note 4). Cost includes contracted services, direct labor and materials, interest capitalized during construction, and certain overhead items. For the Electric System, the provision for depreciation is determined by the straight-line method over the estimated useful lives of the assets (as specified by FERC for utility plant) ranging from three to fifty years. The cost of maintenance and repairs is expensed as incurred; renewals, replacements and betterments are capitalized. Effective January 1, 2017, the capitalization threshold was increased to \$5,000 from \$1,000. For the Cowlitz Falls Project, depreciation, renewals, and replacements are recognized on the basis of the Amendatory Power Purchase Contract between the District and BPA (see Note 6 & Note 8).

The actual or average cost of property replaced or renewed is removed from utility plant and such cost plus removal cost less salvage is charged to accumulated depreciation.

Cash equivalents – The District considers all highly liquid investments, including restricted cash, with a maturity of three months or less to be cash equivalents.

Restricted cash and investments – Restricted cash and investments consist of Board restricted funds set aside and invested by the District in a major catastrophe fund, rate stabilization account and investments restricted by bond resolution. The major catastrophe fund balance provides the District with emergency funds should the District face a catastrophe, such as a major wind storm or other extraordinary event.

Customer and other receivables – Accounts receivable are recorded when invoices are issued and are written off when they are determined to be uncollectible. The allowance for doubtful accounts is estimated based on the District's historical losses, review of specific problem accounts, the existing economic conditions, and the financial stability of its customers. Generally, the District considers accounts receivable past due after 30 days. The allowance for doubtful accounts for the Electric System was \$357,610 and \$416,353 at December 31, 2017 and 2016, respectively. No allowance was deemed necessary for the Cowlitz Falls System.

Inventories – Inventories consist primarily of materials and supplies for construction and maintenance of utility plant and are valued at the lower of average cost or market.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 2 – Summary of Significant Accounting Policies (continued)

Unamortized bond premiums and loss on refunding – Bond premiums relating to revenue bonds are amortized by the effective interest method over the life of bond issues using a weighted average of the face amount of bonds outstanding. Losses on refunding are amortized over the life of the old or new bonds, whichever is shorter. These amounts are recorded as deferred outflow of resources on the statement of net position.

Regulatory assets – unamortized bond issue costs – Unamortized bond issue costs represent the remaining expense related to various debt issuances. The asset is amortized over the duration of the related debt and recognition of these costs is included in the rate making process.

Deferred inflow of resources – The District has deferred revenues to be recognized in future periods in accordance with regulatory accounting requirements. The Board authorized the transfer of \$370,545 and \$92,590 from operating revenues to the rate stabilization account for 2017 and 2016, respectively. Future withdrawals from the rate stabilization account will be used to mitigate potential rate increases or provide for unexpected expenses.

Unamortized prepaid power and attributes – Consists of prepaid power and attributes amortized using the straight-line method over the life of the 2008 Series bonds (see Note 6 – White Creek Wind Project).

Compensated absences – The District accrues accumulated unpaid personal leave benefits as the obligation is incurred. The accrued liability for unpaid personal leave at December 31, 2017 and 2016 was \$1,711,490 and \$1,660,053, respectively. Employees covered by PERS I (see Note 5) are entitled to, upon retirement, the use of up to 60 days of unused personal leave for calculation of retirement benefits. PERS actuarially determines the cost for these additional benefits and bills the District for a portion of them on a one-time basis. These additional costs do not materially affect the District's financial statements. Eligible sick leave balances, meeting certain requirements, may either be converted to personal leave according to a schedule or a percent may be cashed out upon retirement.

Operations and maintenance advance – Operations and maintenance advance represents unspent BPA operation and maintenance advances recognized in accordance with the Amendatory Power Purchase Contract with BPA (see Note 6 & Note 8).

Customer deposits – The District requires deposits from certain customers upon request for service. The customer deposits are held to defray potential uncollected accounts and other contingencies. The deposits are refundable under certain circumstances.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 2 – Summary of Significant Accounting Policies (continued)

Net position – Net position consists primarily of cumulative net income (loss) collected for the payment of utility plant in advance of net accumulated depreciation recognized on such plant. It is the District's intention to set rates at a level to continue replacwing and improving net utility plant. Net position consists of the following components:

- **Net investment in capital assets** – This component of net position consists of capital assets, net of accumulated depreciation, less outstanding balances of any debt borrowings that are attributable to the acquisition, construction or improvement of those assets.
- **Restricted** – This component of net position consists of assets restricted by bond resolutions and assets restricted by Board resolution.
- **Unrestricted** – This component of net position consists of net position that does not meet the definition of "net investment in capital assets" or "restricted."

Revenue recognition – The District recognizes Electric System revenue as earned. Substantially all residential and small commercial customers are billed bimonthly while large commercial and industrial customers are billed monthly. The District utilizes cycle billing and records revenue billed to its customers when the meters are read. In addition, the District recognizes unbilled revenue, revenues from electric power delivered but not yet billed. At December 31, 2017 and 2016, unbilled revenue was \$3,998,825 and \$4,395,394, respectively and included in customer and other receivables. Revenues for the Cowlitz Falls Project are recognized on the basis of the Amendatory Power Purchase Contract between the District and BPA (see Note 6 & Note 8).

Contributed capital – Consists of cash contributions received from customers for the construction of utility plant.

Use of estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Derivative instruments – The District has adopted GASB Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*. Subject to certain exceptions, GASB Statement No. 53 requires every derivative instrument be recorded on the statement of net position as an asset or liability measured at its fair value, and changes in the derivative's fair value be recognized in earnings unless such derivatives meet specific hedge accounting criteria to be determined as effective. Effective hedges qualify for hedge accounting and such changes in fair values are deferred.

It is the District's policy to document and apply as appropriate the normal purchase and normal sales exception under GASB Statement No. 53. The District has reviewed its various contractual arrangements to determine applicability of these standards. Purchases and sales of forward electricity, natural gas and option contracts that require physical delivery and which are expected to be used or sold by the reporting entity in the normal course of business are generally considered "normal purchases and normal sales."

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 2 – Summary of Significant Accounting Policies (continued)

These transactions are excluded under GASB Statement No. 53 and therefore are not required to be recorded at fair value in the financial statements. Certain put and call options and financial swaps for electricity and natural gas are considered to be derivatives under GASB Statement No. 53, and do not generally meet the “normal purchases and normal sales” criteria (see Note 7).

Fair value measurement - In February 2015, the GASB issued Statement No. 72, Fair Value Measurement and Application, effective for financial statements for years beginning after June 15, 2015. This statement clarifies the definition of fair value, establishes general principles for measuring fair value, provides additional fair value application guidance, and enhances disclosures about fair value measurements.

In accordance with GASB 72, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Fair value is a market-based measurement for a particular asset or liability based on assumptions that market participants would use in pricing the asset or liability.

Valuation inputs are assumptions that market participants use in pricing an asset or liability. The hierarchy of inputs used to generate the valuation is classified into three different Levels:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities at the measurement date.
- Level 2 inputs include quoted prices for similar assets or liabilities in markets that are active; quoted prices for identical or similar assets or liabilities in markets that are not active; and inputs other than quoted prices that are observable for an asset, either directly or indirectly.
- Level 3 inputs are unobservable inputs from the asset or liability where there is very little market activity and they should be used only when relevant Level 1 and Level 2 inputs are unavailable.

Fair value measurements are performed on a recurring basis. The fair values of swap contracts as of December 31, 2017 and 2016, were based on the future price curve for the Mid-Columbia Intercontinental Exchange for electricity. The observability of inputs used to perform the measurement results in the swap fair values being categorized as Level 2 on the fair value hierarchy.

Pensions – For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of all state sponsored pension plans and additions to/deductions from those plans’ fiduciary net position have been determined on the same basis as they are reported by the Washington State Department of Retirement Systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms.

Public Utility District No. 1 of Lewis County Notes to Financial Statements

Note 3 – Cash and Investments

The District's investment policy allows for investments in certificates of deposit with financial institutions qualified by the State of Washington Public Deposit Protection Commission, obligations of the U.S. Government and its agencies, the Washington State Treasurer's Local Government Investment Pool and obligations of any State or its political sub-divisions subject to limitations. The primary objectives for the District's investment activities are legality, liquidity, safety and yield.

Custodial credit risk is that, in the event of the failure of the counterparty, the District will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. During 2017 and 2016, the District held no investments. All of the District's cash was deposited in Washington State banks and entirely covered by Federal Deposit Insurance Corporation (FDIC) or collateral held in a multiple financial institution collateral pool administered by the Washington Public Deposit Protection Commission.

Cash and investments as of December 31, 2017 and 2016 are presented on the statement of net position as follows:

	2017	2016
Unrestricted cash and cash equivalents	\$ 11,659,655	\$ 10,612,610
Restricted cash and cash equivalents		
Debt service fund	80,896	462,976
Major catastrophe fund	1,000,000	1,000,000
Rate stabilization fund	4,530,370	4,159,825
Total cash and investments	\$ 17,270,921	\$ 16,235,411

The District created a rate stabilization fund as permitted by the District's System Bond Resolution and is funding it from unrestricted cash and cash equivalents. The Resolution allows the District to use amounts in this fund for its debt service coverage calculation as defined in the District's System Bond Resolution.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 5 – Pension Plans and Other Post-Employment Benefit Plans

The following table represents the pension amounts for the District for all plans subject to the requirements of the GASB Statement 68, *Accounting and Financial Reporting for Pensions*:

	Aggregate Pension Amounts	
	2017	2016
Pension liabilities	\$ 7,532,549	\$ 9,994,358
Deferred outflows of resources	1,240,035	1,969,427
Deferred inflows of resources	1,356,515	180,086
Pension expense	676,123	1,265,535

State sponsored pension plans – Substantially all District’s full-time and qualifying part-time employees participate in one of the following statewide retirement systems administered by the Washington State Department of Retirement Systems, under cost-sharing, multiple-employer public employee defined benefit and defined contribution retirement plans. The state Legislature establishes, and amends, laws pertaining to the creation and administration of all public retirement systems.

The Department of Retirement Systems (DRS), a department within the primary government of the State of Washington, issues a publicly available comprehensive annual financial report (CAFR) that includes financial statements and required supplementary information for each plan. The DRS CAFR may be obtained by writing to:

Department of Retirement Systems
Communications Unit
P.O. Box 48380
Olympia, WA 98540-8380

Or the DRS CAFR may be downloaded from the DRS website at www.drs.wa.gov.

Public Employees’ Retirement System (PERS) – PERS members include elected officials; state employees; employees of the Supreme, Appeals and Superior Courts; employees of the legislature; employees of district and municipal courts; employees of local governments; and higher education employees not participating in higher education retirement programs. PERS is comprised of three separate pension plans for membership purposes. PERS plans 1 and 2 are defined benefit plans, and PERS plan 3 is a defined benefit plan with a defined contribution component.

Public Utility District No. 1 of Lewis County Notes to Financial Statements

Note 5 – Pension Plans and Other Post-Employment Benefit Plans (continued)

PERS Plan 1 provides retirement, disability and death benefits. Retirement benefits are determined as two percent of the member's average final compensation (AFC) times the member's years of service. The AFC is the average of the member's 24 highest consecutive service months. Members are eligible for retirement from active status at any age with at least 30 years of service, at age 55 with at least 25 years of service, or at age 60 with at least five years of service. Members retiring from active status prior to the age of 65 may receive actuarially reduced benefits. Retirement benefits are actuarially reduced to reflect the choice of a survivor benefit. Other benefits include duty and non-duty disability payments, an optional cost-of-living adjustment (COLA), and a one-time duty-related death benefit, if found eligible by the Department of Labor and Industries. PERS 1 members were vested after the completion of five years of eligible service. The plan was closed to new entrants on September 30, 1977.

Contributions – The PERS Plan 1 member contribution rate is established by State statute at 6 percent. The employer contribution rate is developed by the Office of the State Actuary and includes an administrative expense component that is currently set at 0.18 percent. Each biennium, the state Pension Funding Council adopts Plan 1 employer contribution rates. The PERS Plan 1 required contribution rates (expressed as a percentage of covered payroll) for 2017 were as follows:

	PERS Plan 1 Actual Contribution Rates	
	Employer	Employee
January through June 2017	11.18%	6.00%
July through December 2017	12.70%	6.00%
January through December 2016	11.18%	6.00%

The District's actual contributions to the plan UAAL were \$514,748 and \$485,516 for the years ended December 31, 2017 and 2016, respectively.

PERS Plan 2/3 provides retirement, disability and death benefits. Retirement benefits are determined as two percent of the member's average final compensation (AFC) times the member's years of service for Plan 2 and 1 percent of AFC for Plan 3. The AFC is the average of the member's 60 highest-paid consecutive service months. There is no cap on years of service credit. Members are eligible for retirement with a full benefit at 65 with at least five years of service credit. Retirement before age 65 is considered an early retirement. PERS Plan 2/3 members who have at least 20 years of service credit and are 55 years of age or older, are eligible for early retirement with a benefit that is reduced by a factor that varies according to age for each year before age 65. PERS Plan 2/3 members who have 30 or more years of service credit and are at least 55 years old can retire under one of two provisions:

- With a benefit that is reduced by three percent for each year before age 65; or
- With a benefit that has a smaller (or no) reduction (depending on age) that imposes stricter return-to-work rules.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 5 – Pension Plans and Other Post-Employment Benefit Plans (continued)

PERS Plan 2/3 members hired on or after May 1, 2013 have the option to retire early by accepting a reduction of five percent for each year of retirement before age 65. This option is available only to those who are age 55 or older and have at least 30 years of service credit. PERS Plan 2/3 retirement benefits are also actuarially reduced to reflect the choice of a survivor benefit. Other PERS Plan 2/3 benefits include duty and non-duty disability payments, a cost-of-living allowance (based on the CPI), capped at three percent annually and a one-time duty related death benefit, if found eligible by the Department of Labor and Industries. PERS 2 members are vested after completing five years of eligible service. Plan 3 members are vested in the defined benefit portion of their plan after ten years of service; or after five years of service if 12 months of that service are earned after age 44.

PERS Plan 3 defined contribution benefits are totally dependent on employee contributions and investment earnings on those contributions. PERS Plan 3 members choose their contribution rate upon joining membership and have a chance to change rates upon changing employers. As established by statute, Plan 3 required defined contribution rates are set at a minimum of 5 percent and escalate to 15 percent with a choice of six options. Employers do not contribute to the defined contribution benefits. PERS Plan 3 members are immediately vested in the defined contribution portion of their plan.

Contributions – The PERS Plan 2/3 employer and employee contribution rates are developed by the Office of the State Actuary to fully fund Plan 2 and the defined benefit portion of Plan 3. The Plan 2/3 employer rates include a component to address the PERS Plan 1 UAAL and an administrative expense that is currently set at 0.18 percent. Each biennium, the state Pension Funding Council adopts Plan 2 employer and employee contribution rates and Plan 3 contribution rates.

The PERS Plan 2/3 required contribution rates (expressed as a percentage of covered payroll) for 2017 and 2016 were as follows:

	PERS Plan 2/3	
	Actual Contribution Rates	
	<u>Employer 2/3</u>	<u>Employee 2</u>
January through June 2017	11.18%	6.12%
July through December 2017	12.70%	7.38%
Employee PERS Plan 3		varies
January through December 2016	11.18%	6.12%
Employee PERS Plan 3		varies

The District's actual contributions to the plan, excluding the Plan 1 UAAL component, were \$717,363 and \$634,122 for the years ended December 31, 2017 and 2016, respectively.

Public Utility District No. 1 of Lewis County Notes to Financial Statements

Note 5 – Pension Plans and Other Post-Employment Benefit Plans (continued)

Actuarial assumptions – The total pension liability (TPL) for each of the DRS plans was determined using the most recent actuarial valuation completed in 2017 with a valuation date of June 30, 2016. The actuarial assumptions used in the valuation were based on the results of the Office of the State Actuary's (OSA) *2007-2012 Experience Study* and the *2015 Economic Experience Study*.

Additional assumptions for subsequent events and law changes are current as of the 2016 actuarial valuation report. The TPL was calculated as of the valuation date and rolled forward to the measurement date of June 30, 2017. Plan liabilities were rolled forward from June 30, 2016, to June 30, 2017, reflecting each plan's normal cost (using the entry-age cost method), assumed interest and actual benefit payments.

- Inflation: 3% total economic inflation; 3.75% salary inflation
- Salary increases: In addition to the base 3.75% salary inflation assumption, salaries are also expected to grow by promotions and longevity.
- Investment rate of return: 7.5%

Mortality rates were based on the RP-2000 report's Combined Healthy Table and Combined Disabled Table, published by the Society of Actuaries. The OSA applied offsets to the base table and recognized future improvements in mortality by projecting the mortality rates using 100 percent Scale BB. Mortality rates are applied on a generational basis; meaning, each member is assumed to receive additional mortality improvements in each future year throughout his or her lifetime.

There were minor changes in methods and assumptions since the last valuation.

For 2017:

- How terminated and vested member benefits are valued was corrected.
- How the basic minimum COLA in PERS Plan 1 is valued for legal order payees was improved.
- The average expected remaining service lives calculation was revised.

For 2016:

- The assumed valuation interest rate was lowered from 7.8% to 7.7%. Assumed administrative factors were updated.

Discount rate – The discount rate used to measure the total pension liability for all DRS plans was 7.5 percent.

To determine that rate, an asset sufficiency test included an assumed 7.7 percent long-term discount rate to determine funding liabilities for calculating future contribution rate requirements.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 5 – Pension Plans and Other Post-Employment Benefit Plans (continued)

Consistent with the long-term expected rate of return, a 7.5 percent future investment rate of return on invested assets was assumed for the test. Contributions from plan members and employers are assumed to continue being made at contractually required rates (including PERS 2/3, whose rates include a component for the PERS 1 plan liability). Based on these assumptions, the pension plans' fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return of 7.5 percent was used to determine the total liability.

Long-term expected rate of return – The long-term expected rate of return on the DRS pension plan investments of 7.5 percent was determined using a building-block-method. In selecting this assumption, the Office of the State Actuary (OSA) reviewed the historical experience data, considered the historical conditions that produced past annual investment returns, and considered capital market assumptions and simulated expected investment returns provided by the Washington State Investment Board (WSIB). The WSIB uses the capital market assumptions and their target asset allocation to simulate future investment returns over various time horizons.

Estimated rates of return by asset class – Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2017 and 2016, are summarized in the table below. The inflation component used to create the table is 2.2 percent and represents the WSIB's most recent long-term estimate of broad economic inflation.

Asset Class	Target Allocation	% Long-Term Expected Real Rate of Return Arithmetic	
		2017	2016
Fixed income	20%	1.70%	1.70%
Tangible assets	5%	4.90%	4.40%
Real estate	15%	5.80%	5.80%
Global equity	37%	6.30%	6.60%
Private equity	23%	9.30%	9.60%
	<u>100%</u>		

Public Utility District No. 1 of Lewis County
Notes to Financial Statements

Note 5 – Pension Plans and Other Post-Employment Benefit Plans (continued)

Sensitivity of NPL – The table below presents the District's proportionate share of the net pension liability calculated using the discount rate of 7.5 percent, as well as what the District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage point lower (6.5 percent) or 1-percentage point higher (8.5 percent) than the current rate.

	1% Decrease (6.5%)	Current Discount Rate (7.5%)	1% Increase (8.5%)
PERS 1	\$ 4,725,429	\$ 3,879,054	\$ 3,145,912
PERS 2/3	\$ 9,842,897	\$ 3,653,495	\$ (1,417,802)

Pension plan fiduciary net position – Detailed information about the State's pension plans' fiduciary net position is available in the separately issued DRS financial report.

Pension liabilities, pension expense, and deferred outflows of resources and deferred inflows of resources related to pensions – At June 30, 2017 and 2016, the District reported the following net pension liability:

	2017	2016
PERS 1	\$ 3,879,054	\$ 4,539,122
PERS 2/3	3,653,495	5,455,236
	<u>\$ 7,532,549</u>	<u>\$ 9,994,358</u>

At June 30, the District's proportionate share of the collective net pension liabilities was as follows:

	Proportionate Share June 30, 2016	Proportionate Share June 30, 2017	Change in Proportion
PERS 1	0.084520%	0.081749%	-0.002771%
PERS 2/3	0.108348%	0.105151%	-0.003197%

Employer contribution transmittals received and processed by the DRS for the fiscal year ended June 30 are used as the basis for determining each employer's proportionate share of the collective pension amounts reported by the DRS in the *Schedules of Employer and Nonemployer Allocations*.

The collective net pension liability was measured as of June 30, 2017, and the actuarial valuation date on which the total pension liability is based was as of June 30, 2016, with update procedures used to roll forward the total pension liability to the measurement date.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 5 – Pension Plans and Other Post-Employment Benefit Plans (continued)

Pension expense – For the years ended December 31, 2017 and 2016, the District recognized \$676,123 and \$1,265,535, respectively, of pension expense.

Deferred outflows of resources and deferred inflows of resources – At December 31, 2017, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
PERS 1		
Differences between expected and actual experience	\$ -	\$ -
Net difference between projected and actual investment earnings on pension plan investments	-	144,755
Changes of assumptions	-	-
Changes in proportion and differences between contributions and proportionate share of contributions	-	-
Contributions subsequent to the measurement date	265,555	-
Total	<u>\$ 265,555</u>	<u>\$ 144,755</u>
PERS 2/3		
Differences between expected and actual experience	\$ 370,185	\$ 120,157
Net difference between projected and actual investment earnings on pension plan investments	-	973,934
Changes of assumptions	38,807	-
Changes in proportion and differences between contributions and proportionate share of contributions	173,592	117,669
Contributions subsequent to the measurement date	391,896	-
Total	<u>\$ 974,480</u>	<u>\$ 1,211,760</u>
Combined PERS 1 and PERS 2/3		
Differences between expected and actual experience	\$ 370,185	\$ 120,157
Net difference between projected and actual investment earnings on pension plan investments	-	1,118,689
Changes of assumptions	38,807	-
Changes in proportion and differences between contributions and proportionate share of contributions	173,592	117,669
Contributions subsequent to the measurement date	657,451	-
Total	<u>\$ 1,240,035</u>	<u>\$ 1,356,515</u>

Public Utility District No. 1 of Lewis County
Notes to Financial Statements

Note 5 – Pension Plans and Other Post-Employment Benefit Plans (continued)

Deferred outflows of resources related to pensions resulting from the District's contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended December 31, 2018. Other amounts reported as deferred outflows and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	PERS 1
Year ended December 31, 2018	\$ (97,845)
2019	30,891
2020	(7,173)
2021	(70,630)
	PERS 2/3
Year ended December 31, 2018	\$ (298,962)
2019	145,109
2020	(97,672)
2021	(410,397)
2022	14,238
thereafter	18,509

Deferred compensation plan – The District maintains a deferred compensation plan (Internal Revenue Code Section 457) for all eligible employees. The plan is entirely funded by voluntary employee contributions. The District has entered into a contractual relationship with the State of Washington Deferred Compensation Program placing all plan assets into trust for the exclusive benefit of participants and their beneficiaries.

Post-Retirement Benefits Plan Other than Pensions Plan (OPEB) description – The District provides post-retirement health care benefits for retired employees until age 65. Prior to April 1, 2008, these benefits paid for 97% of the medical premiums of retirees through age 65. Effective April 1, 2008 the District pays 95% of the medical premiums of retirees up to the age of 65. Spouses and dependents of retirees' benefits are not paid under the plan but can access the plan on a self-pay basis. Employees that retire with disability retirement under Washington State PERS may continue their health insurance coverage through the District with the same coverage provisions as other retirees. Currently, 8 retirees and 110 active employees are covered under the plan.

Funding policy – The contribution requirements of plan participants are established by the District and may be amended from time to time. It is the District's intent to expense the actuarially determined OPEB cost annually.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 5 – Pension Plans and Other Post-Employment Benefit Plans (continued)

Annual OPEB cost – The District’s annual OPEB cost is calculated based on the annual required contribution of the employer (ARC). The ARC is an amount actuarially determined, based on the entry age normal method, determined in accordance with the guidance of GASB Statement 45.

The ARC represents level funding, that if paid on an ongoing basis, is projected to cover normal costs each year and amortize any unfunded actuarial accrued liabilities over a period not to exceed thirty years. The District’s estimated contributions for 2017 of \$145,142 were less than the current year ARC of \$228,504 and therefore, as of December 31, 2017, the District had an OPEB obligation of \$651,457. The District’s estimated contributions for 2016 of \$125,513 were less than the current year ARC of \$162,101 and therefore, as of December 31, 2016, the District had an OPEB obligation of \$568,095.

Other actuarial assumptions include a rate of return on investments of present and future assets of 3.0%. The health care benefit rate is assumed to increase 9.0% in 2017, and then decreasing to 5.0% annually over 8 years and remaining at 5.0% thereafter. Dental premiums are assumed to increase by 3.0% in all future years.

The District’s annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for 2017, 2016 and 2015 were as follows:

<u>Fiscal Year Ending</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Funded</u>	<u>Net OPEB Obligation</u>
December 31, 2017	\$ 228,504	63.5%	\$ 651,457
December 31, 2016	162,101	77.4%	568,095
December 31, 2015	163,909	86.1%	531,507

Funding status and funding progress – As of January 1, 2017, the most recent actuarial valuation date, the plan was not funded (0%). The actuarial accrued liability for benefits was \$2.3 million, and the actuarial value of assets was zero, resulting in an unfunded actuarial accrued liability (UAAL) of \$2.3 million.

The following table presents a schedule of funding progress for the District’s OPEB Plan:

<u>Actuarial Valuation Date</u>	<u>Actuarial Value of Assets (a)</u>	<u>Entry Age Normal AAL (b)</u>	<u>UAAL (b – a)</u>	<u>Funded Ratio (a / b)</u>	<u>Covered Payroll (c)</u>	<u>UAAL as a Percentage of Covered Payroll ((b – a) / c)</u>
January 1, 2017	\$ -	\$ 2,341,419	\$ 2,341,419	0%	\$ 10,420,498	22%
January 1, 2016	-	2,272,420	2,272,420	0%	10,125,456	22%
January 1, 2015	-	2,251,301	2,251,301	0%	9,930,915	25%

Public Utility District No. 1 of Lewis County Notes to Financial Statements

Note 5 – Pension, Deferred Compensation Plan, and Post-Retirement Benefits (continued)

Actuarial valuations on an ongoing plan involve estimates of the value reported and assumptions about the probability of occurrence of events into the future. Examples include assumptions about future employment, composition of employees, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revisions as actual results are compared with past expectations and new estimates are made about the future.

Note 6 – Purchased Power Contracts

Bonneville Power Administration (BPA) – The District obtains power from BPA under a long-term power purchase agreement. BPA supplies the District's power under a 20-year Block and Slice Power Sale Agreement, which was signed on November 24, 2008, commenced on October 1, 2011, and extends through September 30, 2028. This contract provides federal power in the form of two products: Block and Slice. The monthly Block purchase amounts are fixed hourly values each month, but are shaped somewhat to closer align with the District's monthly power requirements. The non-Slice allocation or Block portion is 0.60243% for fiscal year 2017. The Slice product provides the District 0.96184% of the output of the federal system for fiscal year 2017.

BPA is required by federal law to recover all of its costs through the rates it charges its customers. BPA makes various filings with FERC to confirm that rates are sufficient to cover costs. Under BPA's adopted power and transmission rate provisions, its rates are subject to revision in order to enable BPA to recover its actual costs of service.

Beginning October 1, 2011, BPA changed its rate-making methodology to a tiered rate approach. Each public utility (preference) customer received a High Water Mark (HWM) based on either its 2010 load or average 2007-2008 loads that defined its right to buy power at a Tier 1 rate. The Tier 1 rate is based on the cost of the existing federal system. Both Block and Slice and non-Slice (Load Following) customers' HWMs are translated into "Tier 1 Cost Allocators" (TOCAs) which, when multiplied by the estimated costs of the federal system, determine their power costs. The District's TOCA for fiscal year 2017 and 2016 is 1.54138% and 1.56427%, respectively. There is an additional monthly load shaping charge (or credit) for the Block product, determined by the shape of customers' loads compared to the actual shape of the Federal Columbia River Power System (FCRPS). If preference customers want to buy more BPA power beyond their HWM, it will be sold at a BPA Tier 2 rate set to fully recover BPA's cost of securing additional resources to serve that customer's load. The customer also has the option of serving some or all of their above-HWM load with non-federal resources. The District elected not to purchase any Tier 2 products from BPA during the first purchase period, October 2011 through September 2014, or during the second purchase period, October 2014 through September 2019. The District has surplus energy, on average, over this time period.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 6 – Purchased Power Contracts (continued)

The rate provisions for the Block product include a Cost Recovery Adjustment Clause (CRAC) and a Dividend Distribution Clause (DDC). Either may be triggered if certain thresholds are met. The CRAC allows BPA to raise rates to collect sufficient funds to pay costs. The DDC results in dollars being returned to customers, in the form of future power rate decreases, if excess dollars are collected.

Pursuant to the Slice product rate provisions, the District is subject to additional charges or credits from BPA if BPA's actual costs deviate from budgeted amounts. The Slice product is not subject to the CRAC or DDC; but rather, the District pays its share of cost increases or receives its share of cost decreases through an annual Slice true-up mechanism.

The District also entered into a long term contract with BPA for transmission service, which provides adequate BPA Firm transmission capacity to meet the District's annual system peak load. The transmission contract extends through September 30, 2031.

Energy Northwest – The District is a member of Energy Northwest and a participant in Nuclear Project Nos. 1 and 3 (terminated projects), Columbia Generating Station, the Packwood Lake Hydroelectric Project, and the Nine Canyon Wind Project.

Energy Northwest is a municipal corporation and a joint operating agency of the State of Washington. It has the authority to acquire, construct, and operate plants and facilities for the generation and transmission of electric power and energy.

The membership of Energy Northwest consists of twenty-three public utility districts, including the District, and five cities, all located in the State of Washington.

The District entered into "Net Billing Agreements" with Energy Northwest and the BPA. Under terms of these agreements, the District purchased a maximum of 1.276% of the capacity of Energy Northwest Nuclear Projects (WNP) 1, 2.274% of WNP 2 (now Columbia Generating Station) and 1.103% of Energy Northwest's 70% ownership share of WNP 3. The District in turn sold this capability to BPA. Under the "Net Billing Agreements," BPA is unconditionally obligated to pay the District, and the District is unconditionally obligated to pay Energy Northwest the pro rata share of the total annual costs of each project, including debt service on revenue bonds issued to finance the projects, whether or not the projects are completed, operable or operating and notwithstanding the suspension, reduction or curtailment of the projects' outputs. WNP 2 commenced commercial operation in December 1984. On November 19, 1984, the District withdrew its membership in Energy Northwest and participated in Energy Northwest Projects as a non-member for nearly 25 years. On April 27, 2009, the District approved a resolution to make application to become a member of Energy Northwest and the Energy Northwest Board approved the District's membership on July 23, 2009.

Public Utility District No. 1 of Lewis County Notes to Financial Statements

Note 6 – Purchased Power Contracts (continued)

Packwood Lake Hydroelectric Project – The District is a 14.25% participant in Energy Northwest's 27 MW Packwood Lake Hydroelectric Project (the "Project"), located in the Cascade Mountains south of Mount Rainier. The Project's fifty-year license expired in 2010 and the Project has satisfied all of the requirements for relicensing with the Federal Energy Regulatory Commission and is waiting for final issuance. The participants' original Packwood Agreements with Energy Northwest obligated the 12 participants to pay annual costs and receive excess revenues. Energy Northwest recognizes revenues equal to expenses for each period. No net income or loss is recognized, and no equity is accumulated. Accordingly, no investment for the joint venture is reflected on the District's statement of net position. The participants entered into new Power Sales Contracts with Energy Northwest effective October 1, 2011. The terms are similar to the original 1962 agreements, wherein the participants are obligated for a percentage of the Project costs. However, seven of the participants, including the District, began taking their share of the energy, and four participants with very small shares assigned theirs to Clallam PUD under separate bilateral contracts.

In addition, the District and Energy Northwest have entered into a power transmission service agreement. The agreement, in exchange for providing transmission services to wheel Packwood Power from the Project to the BPA transmission system, provides for the District to receive monthly payments adjusted periodically for actual costs. Revenue amounted to \$617,895 and \$536,971 for the years ended 2017 and 2016, respectively.

Burton Creek Hydroelectric Project – The Burton Creek Hydroelectric Project is located near the east Lewis County town of Packwood. The project is a 560 KWh small hydro owned and operated by a private party. The District previously purchased the output of the Burton Creek Project under a power purchase agreement executed September 29, 2003, at the price of the District's average BPA priority firm monthly energy and demand rates.

The power purchase agreement extended from year to year unless terminated by either party with six months advance notice. Following the 2011 seasonal shutdown, Burton Creek Hydroelectric failed to resume sale and delivery of power. The District terminated the agreement on July 1, 2012 due to default of the sale and delivery obligation.

Not soon after the District terminated the above agreement, an individual notified the District that he had purchased the distressed FERC license for Burton Creek and had approximately one year to repair the facility and move certain Burton Creek components off Federal land and back onto private property. After the project received Qualifying Facility status, the District contracted to purchase the output of the Burton Creek Project effective October 1, 2013. The contract continues through December 31, 2018, unless otherwise terminated per terms in the agreement. Purchase prices are locked in each fall for the ensuing calendar year based on forward Northwest prices.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 6 – Purchased Power Contracts (continued)

Renewable Power Supply – The citizens of Washington State passed Initiative 937 in November, 2006, now codified in the Revised Code of Washington Chapter 19.285 as the Energy Independence Act. This Act mandates renewable energy and conservation targets for the State’s electric utilities with more than 25,000 customers. The District complied with its requirements for the annual renewable energy compliance period ended December 31, 2017 and its two-year conservation compliance period ended December 31, 2017. BPA operated wind projects that are part of the FCRPS, as well as Nine Canyon Wind and White Creek Wind contracts will assist in providing the renewable energy the District will need in order to comply with the Act’s energy targets in the future. At this time the District can meet its I-937 yearly compliance targets with these aforementioned plants using the 3-year REC shaping allowed in the Act. After 2020, the District will meet any new higher REC requirements using either tradable RECs or through purchase agreements from renewable resources.

Nine Canyon Wind Project (Phase I and III) – Located near the city of Kennewick, WA, Nine Canyon Wind Project is owned by Energy Northwest. The District has signed a Power Purchase Agreement for 2% of the output of Phase I. The District’s 2% share represents approximately 1 MW of capacity and based upon a 30% load factor, approximately 2,600 MWh of energy production annually. The District has also signed a Power Purchase Agreement for 15.7% of the output of Phase III. The District’s 15.7% share represents approximately 5 MW of capacity and based upon a 30% load factor, approximately 13,100 MWh of energy production annually.

White Creek Wind Project – On June 20, 2008, the District executed agreements with Klickitat County PUD for the acquisition of a 10% share of the output of the 205 megawatt White Creek Wind Project near Goldendale, Washington for the purchase price of \$36.85 million. The White Creek Wind Project agreements include but are not limited to the Energy Marketing Agreement. On June 16, 2008, the District issued bonds to finance a portion of the White Creek Wind Project purchase (see Note 13).

The prepaid power agreements are amortized using the straight line method over the 20 year contract period and had amortization in 2017 and 2016 totaling \$1,889,538. The District’s 10% share represents approximately 20.5 MW of capacity and based upon a 32% load factor, approximately 57,500 MWh of energy production annually.

Power management – In 2011, the District entered into a power management services agreement with The Energy Authority Inc. (TEA) to provide certain power scheduling, purchasing, sales and related services to assist in the short term management of the District’s power supply. Power purchases and sales are managed by the District in accordance with adopted risk management policies.

Public Utility District No. 1 of Lewis County Notes to Financial Statements

Note 7 – Derivative Instruments

As of December 31, 2017 and 2016, the District had the following derivative instruments outstanding:

	Changes in Fair Value		Fair Value at December 31, 2017		Notional
	Classification	Amount	Classification	Amount	
Cash Flow Hedges:					
Financial Swap Forward	Deferred Inflow	\$ 281,363	Derivative Asset	\$ 281,363	78,675 MWH
Financial Swap Forward	Deferred Outflow	235,148	Derivative Liability	235,148	53,880 MWH
	Changes in Fair Value		Fair Value at December 31, 2016		
	Classification	Amount	Classification	Amount	Notional
Cash Flow Hedges:					
Financial Swap Forward	Deferred Inflow	\$ 238,361	Derivative Asset	\$ 238,361	35,480 MWH
Financial Swap Forward	Deferred Outflow	245,854	Derivative Liability	245,854	28,025 MWH

The fair values of the financial swap contracts were based on the futures price curve for the Mid-Columbia Intercontinental Exchange for electricity. The financial swaps were entered into between February 2016 and December 2017, with maturity dates through December 2020. As of December 31, 2017, the financial swap contracts included a notional extended value of \$1,264,230. As of December 31, 2016, the financial swap contracts included a notional extended value of \$1,150,539.

Objective and strategies – The District enters into derivative energy transactions to hedge its known or expected positions within its approved Risk Management Policy. Decisions are made to enter into forward transactions to protect its financial position, specifically to deal with expected long and short positions as determined by projected load and resource balance positions. Generally, several strategies are employed to hedge the District's resource portfolio, including:

Surplus Purchased Power Resources – The District hedges projected surpluses in future periods by locking in a forward price. Surplus power is generally sold forward at a fixed-price, either physically or financially, when the probability of surplus is high.

Deficit Power Resources – The District hedges projected power resource deficits in future periods by purchasing power. Power is generally purchased to cover projected deficits at a fixed price, either physically or financially, when the probability of the deficit position is high.

Derivatives authorized under the Risk Management Policy by the District include:

- Physical power forward purchases and sales
- Monthly and daily power physical calls and puts
- Power and natural gas fixed for floating swaps
- Monthly financial Asian power call and put options
- Financial daily power put and call options
- Monthly power swaptions

There is no associated debt for these instruments at December 31, 2017.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 7 – Derivative Instruments (continued)

Credit risk – The District is a member of TEA. The District adheres to the credit policies and credit limits agreed to by TEA and the District. TEA's policy addresses guidelines for setting credit limits and monitors credit exposure on a real time basis on behalf of the District. TEA's management determines the credit quality of the District's counterparties based upon various credit evaluation factors, including collateral requirements under certain circumstances.

All physical commodity transactions (for hourly and/or daily) for the District are traded by TEA as principle (on behalf of the District) and rely on TEA's credit limits. All forward physical/financial commodity transactions are entered into only with counterparties approved by the District's Risk Management Committee for creditworthiness. As of December 31, 2017, the District had 10 counterparties. The maximum credit extended to any one counterparty is \$1.75 million.

The District entered into master enabling agreements with various counterparties, which enable hedging transactions. Such agreements include the International Swap Dealers Association Agreements (ISDA) for financial transactions. All of the enabling agreements have provisions addressing credit exposure and provide for various remedies to assure financial performance, including the ability to call on additional collateral as conditions warrant, generally as determined by the exposed party. The District also uses netting provisions in the agreement to diffuse a portion of the risk.

Transactions under the ISDA agreements are used to financially hedge monthly long or short positions to reduce the risk of an underlying physical position by using Risk Management Committee approved financial instruments.

Basis risk – The District proactively works to eliminate or minimize basis risk on energy transactions by entering into derivative transactions that settle pursuant to an index derived from market transactions at the point physical delivery is expected to take place. At December 31, 2017, there are no derivative transactions outstanding that carry basis risk. As applicable, all power related transactions are to be settled on the relevant Mid-Columbia Intercontinental Exchange index and all gas transactions are to be settled on the relevant Sumas/Huntingdon index.

Termination risk – As of December 31, 2017, no termination events have occurred and there are no outstanding transactions with material termination risk. None of the outstanding transactions have early termination provisions except in the event of default by either counterparty. Events of default are generally related to (i) failure to make payments when due, (ii) failure to provide and maintain suitable credit assurances as required, (iii) bankruptcy or other evidence of insolvency, or (iv) failure to perform under any material provision of the agreement. Failure to provide or receive energy or natural gas under physical commodity transactions does not generally fall under the events of default provisions, unless the non-performing party fails to pay the resulting liquidated damages as they come due.

Public Utility District No. 1 of Lewis County Notes to Financial Statements

Note 8 – District Hydroelectric Projects

Cowlitz Falls Project – The Cowlitz Falls Project is located on the upper Cowlitz River in eastern Lewis County, Washington upstream from two existing hydroelectric projects, Mayfield and Mossyrock, owned by the City of Tacoma. The Project includes a concrete gravity dam and powerhouse, a reservoir covering about 610 acres extending approximately 10 miles up the Cowlitz River and 1.5 miles of the Cispus River, and 5.2 miles of overland transmission line to the District's Glenoma Substation.

The powerhouse contains two Kaplan turbine generating units with net installed capacity of 35 MW each at a rated head of 87.5 feet. Average annual energy generation is estimated at 261 million kilowatt hours. Project operation depends upon the "run of the river" to produce the maximum amount of electric energy, instead of extensively regulating the reservoir behind the dam to maximize the Project's firm or dependable capacity.

In June 1986, the District was granted a license by FERC to proceed with the development and construction of the Cowlitz Falls Project. On May 23, 1991, the District and BPA executed an Amendatory Power Purchase Contract. Construction of the Project began in July 1991 and the Project began commercial operation on June 29, 1994.

Revenues for the Cowlitz Falls System are recognized on the basis of the Amendatory Power Purchase Contract between the District and BPA. Through this contract, BPA receives all output from the Cowlitz Falls Project in exchange for payment of all operation and maintenance costs and debt service on Cowlitz Falls revenue bonds (see Note 12). The District receives monthly operation and maintenance payments from BPA based upon an annual budget of operating and capital project expenditures. Certain operation and maintenance costs are subject to incentive or reimbursement provisions if actual expenses are less or more than certain budgeted amounts. The District did not receive any incentive payments for the years ended December 31, 2017 and 2016. Debt service payments are made by BPA directly to the Bond transfer agent for payment of scheduled bond interest and principal.

The District records the Cowlitz Falls System activity reflecting the cost reimbursement basis of the Amendatory Power Purchase Contract with BPA. As a result, revenues and costs offset one another with no resulting net income or loss. The Cowlitz Falls System consists of essentially two activities, plant construction and related debt service, and operations and maintenance. For related debt service, revenue is recognized primarily for BPA debt service payments. Expenses consist of interest on the outstanding revenue bonds, depreciation, and amortization of bond costs. For operations and maintenance, revenue is recognized primarily for BPA operation and maintenance advances, and interest income on unspent advances. Expenses consist of operation and maintenance costs, including plant renewals and replacements, and taxes.

As part of the contract, the District (Electric System) provides power transmission services to BPA over facilities of both the City of Tacoma (Tacoma) and the District. The terms and conditions for the use of the Tacoma facilities are governed by an agreement between Tacoma and the District. Costs are passed to BPA as part of the District's contract with BPA. Revenue amounted to \$778,411 and \$988,143 for the years ended 2017 and 2016, respectively.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 8 – District Hydroelectric Projects (continued)

Mill Creek Hydroelectric Project – The Mill Creek Hydroelectric Project is located on Mill Creek, a tributary to the Cowlitz River, near Salkum, Washington and the Cowlitz Salmon Hatchery. The project includes a six foot high concrete diversion structure, 1,500 feet of 42 inch concrete cylinder pipe and a concrete block powerhouse downstream. The powerhouse contains two Francis turbine induction generating units with net installed capacity of 300 KW each at an average head of 96 feet.

Note 9 – Conservation Programs

The District has participated in BPA programs over the past several years to more aggressively seek out and acquire energy efficiency savings. On March 3, 2004, the District signed a Purchase of Conservation Agreement with BPA for the purpose of offering conservation under a program known as “Conservation as Part of Augmentation” (ConAug). On July 10, 2006, the District signed a Conservation Acquisition Agreement (CAA) with BPA for purpose of offering conservation to commercial and industrial customers. On September 22, 2009 the District executed the “Energy Conservation Agreement” (ECA) with BPA to continue efforts begun under the ConAug and CAA agreements. The District continues to offer commercial and industrial energy efficiency measures through the ECA program.

In 2009, the District completed a Conservation Potential Assessment (CPA) as part of the requirements under the Energy Independence Act adopted with passage of Initiative 937. The CPA developed 20 year and 10 year conservation plans with a defined target equaling 20% of the corresponding 10 year potential starting in 2010. Every two years the District must update the CPA with new information and establish a new target for the subsequent two year period. The CPA for the 2016-2017 biennium set the energy savings target for this period at 0.63 aMW, or approximately 2,759 MWh for each year. Through conservation programs described above and indirect savings acquired through the activities of NEEA, the District will exceed the 2016-2017 target.

Note 10 – Fiber Optic Activity

The District’s fiber optic based communication system consists of approximately 87 miles of overhead ADSS fiber optic cable, primarily following the District’s transmission routes. The District is constructing the system to support its Electric System with communication between its offices and various substations located throughout Lewis County.

The District has also leased portions of excess dark fibers to telecommunication companies, BPA, non-profit, and governmental agencies. Expansion of the system may occur where it best meets the District’s communication needs.

Public Utility District No. 1 of Lewis County
Notes to Financial Statements

Note 10 – Fiber Optic Activity (continued)

Selected financial data is reported as follows for the year ended:

	2017	2016
Telecommunication services		
Operating revenues		
Dark fiber leases	\$ 396,176	\$ 363,600
Total operating revenues	396,176	363,600
Operating expenses		
Operating expenses	122	-
Maintenance expense	8,725	2,480
Depreciation expense	96,934	90,198
Total operating expenses	105,781	92,678
Net operating revenue	\$ 290,395	\$ 270,922
Capital investment		
Net telecommunication plant	\$ 1,327,707	\$ 1,410,317

Note 11 – PURMS Self-Insurance Agreement

The District and eighteen other PUD's participate in a joint self-insurance pool in affiliation with Public Utility Risk Management Services (PURMS).

Liability risk pool – PURMS provides liability insurance coverage for its members participating in the Liability Risk Pool (Liability Pool) and to a limited extent for the benefit of their employees under an agreement entitled "PURMS Joint Self-Insurance Agreement" (amended and restated as of November 10, 2011, "SIA"). Under SIA, the Liability Pool had a self-insured retention of \$1,000,000 per occurrence, which was the Coverage Limit in effect for 2017, and in effect as of December 31, 2017.

The Liability Pool is funded through assessments of its participating members. Assessments are levied at the beginning of each calendar year to replenish the Liability Pool to its designated risk pool balance, and at any time during the year that either (a) the actual risk pool balance becomes \$500,000 less than the designated risk pool balance or (b) the risk pool balance is depleted to the amount of 70% funding level established by the actuarial report for the liability pool. For calendar year 2017, the designated risk pool was \$3,350,000.

At all times, PURMS also maintains excess liability coverage for its members in the Liability Pool. For the year 2017, the first layer of such excess coverage was \$35,000,000 and the additional layer of excess coverage was \$25,000,000 excess of \$35,000,000 and the Liability Pool's \$1,000,000 self-insured retention.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 11 – PURMS Self-Insurance Agreement (continued)

As of December 31, 2017, there were 95 known incidents or unresolved liability claims pending against one or more members or former members of PURMS' Liability Pool. The total dollar amount of the risk posed by these pending liability claims to such members and to the Liability Pool itself is not precisely determinable, and can only be estimated. The case reserves set by the administrator for these claims, as of December 31, 2017, was \$263,434.

PURMS informs the members of its risk pools in writing of their respective share of the actuarially-based "Claims Reserves Receivable", for the risk pools in which they participate ("CCR Allocation"), determined in accordance with a "10-Year Look-Back Period". PURMS' administrator has calculated each Liability Pool member's CCR Allocation for FY 2017, based on the 80% confidence level estimated by the 2017 Actuarial Report. The District's portion of the Liability Pool CCR Allocation for 2017 is \$225,536.

Property risk pool – PURMS provides property insurance for its members participating in the Property Risk Pool (Property Pool) in accordance with the terms of the SIA (identified above). Under the SIA, from its inception in 1997 to the present, the Property Pool has had a self-insured retention (or Property Coverage Limit) of \$250,000 per property loss.

The Property Pool is funded to the amount of its Designated Property Pool Balance, which in 2017 was \$750,000. The Property Pool's operations are financed through assessments of its Members in accordance with the terms of the Property General Assessment Formula. A Property Assessment is issued automatically at the beginning of each calendar year to replenish the Property Pool to its Designated Balance. Property Assessment are also issued at any time during the year that the Actual Property Pool Balance drops below \$500,000 or is depleted to the amount of the 70% funding level established by the annual actuarial report for the Property Pool.

The Property Pool also provides its members with automatic extended property coverage. This coverage extends property coverage for property losses that exceed the Property Pool's \$250,000 property coverage limit if those losses are also subject to increased retentions under the excess property insurance. Under the excess property insurance retentions in effect for 2017, the maximum exposure to the Property Pool from a property loss that exceeded \$250,000, and that was subject to an increased retention, was \$250,000, less the applicable deductible, or a maximum of \$250,000 more than the property coverage limit.

At all times, PURMS also maintains excess property coverage for its members in the Property Risk Pool. For the year 2017, the amount of such excess coverage was \$200,000,000, with various sublimits, and with excess coverage attaching at the \$250,000 property coverage for all property losses except those subject to increased retention levels for certain property risks.

As of December 31, 2017, there were 8 known incidents or unresolved property claims pending against one or more members of PURMS' Property Pool. The total dollar amount of the risk posed to the Property Pool by these pending claims is not precisely determinable, and can only be estimated. The case reserves set by the administrator for these claims, as of December 31, 2017, was \$99,204.

Public Utility District No. 1 of Lewis County
Notes to Financial Statements

Note 11 – PURMS Self-Insurance Agreement (continued)

PURMS' administrator has calculated each Property Pool member's CCR Allocation for FY 2017, based on the 80% confidence level estimated by the 2017 Actuarial Report. The District's portion of the Property Pool CCR Allocation for 2017 is \$31,168.

Note 12 – Cowlitz Falls Hydroelectric Project Revenue Bonds

In July 2013, the Board issued \$87,995,000 in Cowlitz Falls Hydroelectric Project Revenue Refunding Bonds to refund the series 2003 bond issues, with an average interest rate of 4.79%. The balance of the refunding included proceeds from premium on issue of \$12,278,112. Underwriting fees and other issuance costs totaled \$925,151. The loss on refunding was \$5,284,305 and is being charged to operations through the year 2024 using the effective interest method. The deferred loss outstanding was \$2,881,024 and \$3,387,758 as of December 31, 2017 and 2016, respectively.

The 2013 Bonds are special limited obligations of the District secured by a lien and charge on the Cowlitz Falls revenues and bond insurance. Pursuant to a Power Purchase Contract and Payment Agreement all Project output has been sold to BPA. BPA is obligated to pay all operation and maintenance costs including debt service on the Bonds, whether or not the Dam is operating or operable (see Note 8).

	2017	2016
2013 Revenue Bonds to refund 2003 revenue bonds due April 1, 2032	\$ 75,595,000	\$ 78,905,000
Less current maturities	3,475,000	3,310,000
Long-term portion of revenue bonds	\$ 72,120,000	\$ 75,595,000

Scheduled debt service deposits for principal, interest and principal maturities are as follows:

	2013 Revenue Bonds		
	Principal	Interest	Total
2018	\$ 3,475,000	\$ 3,826,413	\$ 7,301,413
2019	3,650,000	3,652,662	7,302,662
2020	3,830,000	3,470,163	7,300,163
2021	4,020,000	3,278,662	7,298,662
2022	4,220,000	3,077,663	7,297,663
2023 – 2027	24,575,000	11,928,013	36,503,013
2028 – 2032	31,825,000	4,674,319	36,499,319
	\$ 75,595,000	\$ 33,907,895	\$ 109,502,895

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 12 – Cowlitz Falls Hydroelectric Project Revenue Bonds (continued)

Long-term debt activity for the year ended December 31, 2017 was as follows:

	Outstanding January 1, 2017	Additions	Reductions	Outstanding December 31, 2017	Due Within One Year
2013 Revenue Bonds	\$ 78,905,000	\$ -	\$ (3,310,000)	\$ 75,595,000	\$ 3,475,000

Long-term debt activity for the year ended December 31, 2016 was as follows:

	Outstanding January 1, 2016	Additions	Reductions	Outstanding December 31, 2016	Due Within One Year
2013 Revenue Bonds	\$ 82,055,000	\$ -	\$ (3,150,000)	\$ 78,905,000	\$ 3,310,000

Note 13 – Electric System Revenue Bonds, Series 2008

In June 2008, the District issued two series of revenue bonds in the aggregate amount of \$36,690,000 to finance capital improvements to the Electric System and acquire the right to energy and other attributes from the White Creek Wind Project (see Note 6). The bonds consist of two series, Series 2008A, in the principal amount of \$19,415,000 with an interest rate of 5.00%, and Series 2008B (Taxable) in the principal amount of \$17,275,000 with interest rates ranging from 3.64% to 5.32%.

In December 2016, the District issued \$20,602,385 of Electric System Revenue Refunding Bonds, Series 2016 with an average interest rate of 2.08% to advance refund \$19,415,000 of outstanding Revenue Bonds, Series 2008A with an average interest rate of 5.0%. The proceeds were used to purchase U.S. State and Local Government Series securities that were placed in an irrevocable trust for the purpose of generating resources for all future debt service payments on the Series 2008A bonds. As a result, the Series 2008A bonds are considered to be defeased and the liability for those bonds have been removed from the financial statements. This advance refunding was undertaken to reduce total debt service over the next 11 years by \$2,955,390 and resulted in an economic gain of \$2,586,188.

These bonds are subject to covenants which specify the order of application of gross revenue requirements and which require the District to: pay costs of maintenance and operations; costs associated with the generation, conservation, transformation, transmission or distributions of power and energy acquired or purchased or constructed by the District; and to make all payments required to be made into the Bond Account. Other covenants also apply. The 2008 Series bonds were issued with a premium of \$1,146,751 and had underwriting fees and other issuance costs of \$982,888.

Public Utility District No. 1 of Lewis County
Notes to Financial Statements

Note 13 – Electric System Revenue Bonds, Series 2008 (continued)

Scheduled debt service deposits for principal and interest and principal maturities are as follows:

	Series 2016 Bonds		
	Principal	Interest	Total
2018	\$ 542,220	\$ 428,530	\$ 970,750
2019	2,049,072	417,251	2,466,323
2020	2,093,693	374,630	2,468,323
2021	2,134,741	331,082	2,465,823
2022	2,182,144	286,679	2,468,823
2023 – 2027	11,600,515	733,853	12,334,368
	<u>\$ 20,602,385</u>	<u>\$ 2,572,025</u>	<u>\$ 23,174,410</u>

The District issued \$9,499,000 in Revenue Bonds in June 1992 for financing a portion of the District's Capital Improvement Program and conservation efforts. The Program made capital improvements and completed conservation efforts of \$13 million over a two year period. On November 29, 1994, the District deposited \$9,480,300 in an irrevocable trust with an escrow agent to provide for all future debt service payments on the 1992 Series bonds. The balance outstanding at December 31, 2016 was \$765,000 and the final payment was made in June 2017.

These refunded bonds constitute a contingent liability of the District only to the extent that cash and investments presently in the control of the refunding trustees are not sufficient to meet debt service requirements, and are therefore excluded from the financial statements because the likelihood of additional funding requirements is considered remote.

Long-term debt activity for the year ended December 31, 2017 was as follows:

	Outstanding January 1, 2017	Additions	Reductions	Outstanding December 31, 2017	Due Within One Year
Series 2016 Bonds	\$ 20,602,385	\$ -	\$ -	\$ 20,602,385	\$ 542,220
Series 2008 B Bonds	5,275,000	-	(5,275,000)	-	-
Total bonded debt	<u>\$ 25,877,385</u>	<u>\$ -</u>	<u>\$ (5,275,000)</u>	<u>\$ 20,602,385</u>	<u>\$ 542,220</u>

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 13 – Electric System Revenue Bonds, Series 2008 (continued)

Long-term debt activity for the year ended December 31, 2016 was as follows:

	Outstanding January 1, 2016	Additions	Reductions	Outstanding December 31, 2016	Due Within One Year
Series 2016 Bonds	\$ -	\$ 20,602,385	\$ -	\$ 20,602,385	\$ -
Series 2008 A Bonds	19,415,000	-	(19,415,000)	-	-
Series 2008 B Bonds	7,220,000	-	(1,945,000)	5,275,000	5,275,000
Total bonded debt	<u>\$ 26,635,000</u>	<u>\$ 20,602,385</u>	<u>\$ (21,360,000)</u>	<u>\$ 25,877,385</u>	<u>\$ 5,275,000</u>

Note 14 – Line of Credit

On October 18, 2011, the District and West Coast Bank (now Columbia Bank) entered into a Loan Commitment for a Revolving Line of Credit (LOC) with an available commitment of \$5 million. The District may use the proceeds of any draws on the LOC to fund short-term cash flow needs and shall accrue interest from the date money is drawn at the prime rate defined in the note resolution. The initial term of the Loan Commitment expired on October 18, 2013. The LOC was extended for up to an additional 38 months expiring on December 1, 2016. On December 1, 2016, the LOC was extended for an additional 36 months, expiring December 1, 2019. As of December 31, 2017, the District has not drawn on the LOC.

Note 15 – Endangered Species Listing of Salmon and Steelhead/American Rivers Intent to Sue

The National Marine Fisheries Service (NMFS) has listed the lower Columbia Chinook salmon and steelhead trout as threatened under the Endangered Species Act (ESA). The Cowlitz River is a tributary of the lower Columbia River and the Cowlitz Falls Project operates on the upper Cowlitz River.

On January 14, 2000, American Rivers, Trout Unlimited, Friends of the Cowlitz, CPR Fish and the Cowlitz Indian Tribe filed a Notice of Intent to Sue for Violations of the ESA. The Notice claims the FERC, BPA, and District are violating the ESA by continued operation of the Cowlitz Falls Project. American Rivers indicates that unless BPA and FERC initiated consultation under Section 7 of the ESA with NMFS regarding the impact of the Project on listed species, and unless immediate action is taken to bring the Project into compliance, they will file suit against BPA, FERC, and the District.

As a result of the Cowlitz Falls Project operation and the ESA anadromous fish listings, the District (as the non-Federal representative to FERC) initiated consultation with the FERC and NMFS to evaluate possible ESA impacts of the Project. As part of the consultation the District completed a draft Biological Assessment (BA) of the Cowlitz Falls Project benefits, impacts, and operation in March 2002 and submitted it to the FERC. The FERC accepted the draft BA, finalized it and submitted it to NMFS in July 2002.

Public Utility District No. 1 of Lewis County

Notes to Financial Statements

Note 15 – Endangered Species Listing of Salmon and Steelhead/American Rivers Intent to Sue (continued)

In June 2009, the NMFS issued a Biological Opinion (BiOp) for the Project which allows limited “Take” of the threatened species. The BiOp was submitted to the FERC for inclusion as a Project License amendment which includes studies and mitigation measures to reduce impacts to the species at the Project. As of this time the FERC has not acted on the BiOp. In the interim, the District has evaluated and/or implemented many of the reasonable and prudent measures for protection of the species at the Project. On April 9, 2013, NMFS updated the BiOp’s Incidental Take Statement and study schedule.

On June 20, 2014, Tacoma Power, BPA and the District signed the “Northshore Project Easement Agreement” whereby BPA signed over ownership of the Cowlitz Falls Fish Facility (CFFF) and the Stress Relief Ponds (located at the downstream salmon hatchery). The District agreed to provide access and easement areas to Tacoma Power so that a new fish collection facility could be combined with the existing CFFF. Tacoma Power’s goal is to improve fish collection efficiencies to 95%. On August 18, 2014, FERC issued an “Order Approving Non-Project Use of Project Lands” thereby approving the easement to allow Tacoma Power to build the new collector. Tacoma Power broke ground for the collector in June 2015. The Northshore collector was completed in 2017. Testing and debugging is ongoing and fish are being collected.

As stated in Note 8, BPA pays all operation and maintenance costs of the Cowlitz Falls Project. As such, the above matters are not expected to impact the District’s financial position.

Note 16 – Subsequent Event

On February 6, 2018, the Board of Commissioners passed Resolution No. 2795 revising certain rate schedules effective March 1, 2018. The kilowatt hour charge was increased by 4.0%.

* Effective July 2012 a certain portion of contributions from PERS Plan 2/3 is allocated to PERS Plan 1 in order to fund its unfunded actuarial accrued liability (UAAL)

Report of Independent Auditors on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

Board of Commissioners
Public Utility District No. 1 of Lewis County
Chehalis, Washington

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, which comprise the statement of net position as of December 31, 2017, and the related combined and separate statements of revenues, expenses and changes in net position and cash flows for the year then ended, and the related notes to the financial statements of the Public Utility District No. 1 of Lewis County's Electric System and Cowlitz Falls System (the District), which collectively comprise the Public Utility District No. 1 of Lewis County's financial statements, and have issued our report thereon dated May 25, 2018.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. *A material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. *A significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether District's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance, and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
